

BLÜCHER® DRAIN

Customised gratings

Design your personal grate

- Grating design to your individual specifications
- Logo, text or image
- Stylish triangles, elegant channels or classic squares

KEEPING UP THE FLOW

Design your personal drain grate

BLÜCHER offers you the opportunity to personalize your bathroom with a shower grating designed to your individual specifications.

Stylish shapes and high quality

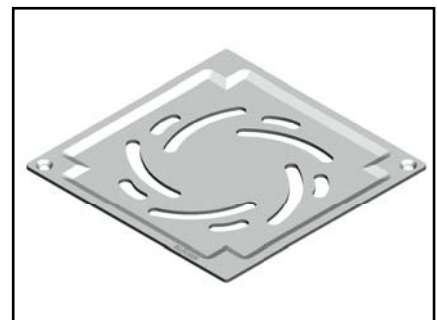

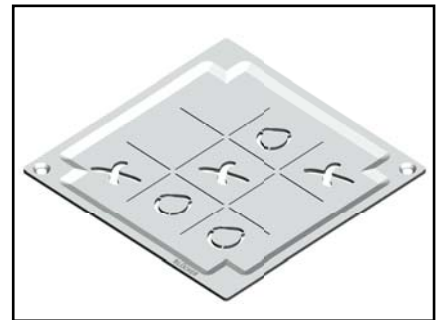

Choose your own design - from company logo to text. The design can be laser cut in three different grating shapes: TRIO, SQUARE or LINE.

The gratings are in the renowned BLÜCHER quality with brushed stainless steel finish.

Numerous applications

The customised BLÜCHER grates are suitable in particular for commercial building projects where the owner wants to add his individual mark to the project, for instance through a logo or a text.

Gratings with logo are also suitable in restaurants, hotels, etc. where they contribute to recognition and image in all details.

Standards and requirements

The holes and cutouts in the grating cannot exceed 8 mm to ensure that the grating complies with European standard EN 1253, and for instance children cannot cut their feet on the grating.

As the cutouts and consequently the hole size will differ from grating design to grating design, BLÜCHER is not able to guarantee that flow and loading class will be in accordance with EN 1253.

How to order

Call our customer center and ask for an order form for customised design gratings. When we have received the completed form from you together with drawings and font types we will prepare a production drawing and a sample for your approval. This is to ensure that the grating fulfills your requirements.

Minimum order quantity is 50 grates of the same design.
