

# BLÜCHER® EUROPIPE

## New OD40 mm pipe range

- **Cost effective:** Up to 15% price reduction compared to 50 mm BLÜCHER® EuroPipe
- **Low weight:** 20% lower weight compared to 50 mm BLÜCHER® EuroPipe and comparable to weight of plastic pipework systems
- **Space saving:** Takes up 20% less space compared to 50 mm BLÜCHER® EuroPipe

KEEPING UP THE FLOW

## BLÜCHER® EuroPipe stainless steel sanitary discharge system

- Stainless steel push-fit pipework system in diameters 40, 50, 75, 110, 125, 160 and 200 mm for marine applications
- For black and grey water in vacuum and gravity systems
- Fire approved products tested and approved according to IMO Res. A.754(18), fire class A0-A60
- Suitable for installation in steel and aluminium structures
- Exceptionally long product life expectancy

## New BLÜCHER® EuroPipe OD40 mm pipes and fittings

### Lower costs

BLÜCHER® EuroPipe OD40 mm provides up to 15% price reduction as compared to the corresponding OD50 mm range.

### Low weight

BLÜCHER® EuroPipe OD40 mm weighs 20% less than the corresponding OD50 mm range - even considering that the entire BLÜCHER® EuroPipe programme is a thin-walled stainless steel pipework system with a weight comparable to that of plastic pipework.

### The perfect choice for narrow spaces

The BLÜCHER® EuroPipe OD40 mm is the best solution for installations where space is limited, e.g. behind panels and ceilings.

### High flow capacity

Due to a wall thickness of just 1 mm and a smooth inside surface, the BLÜCHER® EuroPipe OD40 mm pipes has a flow capacity approximately 10% higher than pipes in other materials with similar outside diameter.

### Material

All in stainless steel grade AISI 304 or optionally grade AISI 316L.

KEEPING UP THE FLOW
